Ultrasonics Sonochemistry 3 (1996) S261–S262

Ultrasonics SONOCHEMISTRY

# Author Index to Volume 3

Ait-Iyazidi, H., see Trabelsi, F. S125
Akagi, J.-i., see Enomoto, N. S97
Akama, M., see Takizawa, Y. S201
Amano, T., see Koda, S. S91
Ando, T., Fujita, M., Kimura, T., Leveque, J.-M., Luche, J.-L. and Sohmiya, H.
Mechanism of sonochemical excitation in the reactions of lead tetraacetate with some organic substrates S223
Ando, T., see Kimura, T. S157
Arai, K., see Takizawa, Y. S201

Bandow, H., see Okitsu, K. S249
Berlan, J., see Trabelsi, F. S125
Biglow, J., see Tata, D.B. S39
Bouaziz, Z., see Nebois, P. S7
Bremmer, D.H., Mitchell, S.R. and Staines, H.
Investigation into the effect of ultrasound on the dimerization of pivalic acid using Fenton's reagent S47

Caulier, T., see Reisse, J. S147
Chia, L.S., see Goh, N.K. S209
Compton, R.G., see Marken, F. S131
Coury, Jr., L.A., see Madigan, N.A. S239

De Baets, R., see Drijvers, D. S83
De Pauw, D., see Lepoint-Mullie, F. S73
De Visscher, A., see Drijvers, D. S83
Deckerkheer, C., see Reisse, J. S147
Delmas, H., see Trabelsi, F. S125
Delplancke, J.L., see Reisse, J. S147
Drijvers, D., De Baets, R., De Visscher, A. and Van Langenhove, H.
Sonolysis of trichloroethylene in aqueous solution: volatile organic intermediates S83
Dunn, F., see Tata, D.B. S39

Elečko, P., see Poláčková, V. S15
Enomoto, N., Koyano, T. and Nakagawa, Z.
Effect of ultrasound on synthesis of spherical silica S105
Enomoto, N., Akagi, J.-i. and Nakagawa, Z.
Sonochemical powder processing of iron hydroxides S97
Entezari, M.H. and Kruus, P.
Effect of frequency on sonochemical reactions – II: Temperature and intensity effects S19

Fabre, O., see Reisse, J. S147
Fabre, P.-L., see Trabelsi, F. S125
Fang, X., Mark, G. and von Sonntag, C.
OH radical formation by ultrasound in aqueous solutions – Part I: the chemistry underlying the terephthalate dosimeter S57
Feng, R., see Wang, S. S65, S69
Fillion, H., see Nebois, P. S7
Francony, A. and Pétrier, C.
Sonochemical degradation of carbon tetrachloride in aqueous solution at two frequencies: 20kHz and 500kHz S77
Fujita, M., see Kimura, T. S157
Fujita, M., see Ando, T. S223

Goh, N.K., Teoh, A.C.C., Chia, L.S. and Teo, K.C.
Educational aspects of sonochemistry: the role of sonochemistry at high school level S209

Hagan, C.R.S., see Madigan, N.A. S239
Harvey, B.F., see Whillock, G.O.H. S111
Hirai, K., Nagata, Y. and Maeda, Y.
Decomposition of chlorofluorocarbons and hydrofluorocarbons in water by ultrasonic irradiation S205
Höchemer, R., see Hoffmann, M.R. S163
Hoffmann, M.R., Hua, I. and Höchemer, R.
Application of ultrasonic irradiation for the degradation of chemical contaminants in water S163
Hua, I., see Hoffmann, M.R. S163
Hutt, K., see Mason, T.J. S53

Ikeda, S., see Kimura, T. S157

Kawabata, K., see Umemura, S. S187
Kawabata, K. and Umemura, S.
Effect of second-harmonic superimposition on efficient induction of sonochemical effect S1
Kimura, T., Sakamoto, T., Leveque, J.-M., Sohmiya, H., Fujita, M., Ikeda, S. and Ando, T.
Standardization of ultrasonic power for sonochemical reaction S157
Kimura, T., see Ando, T. S223
Koda, S., see Nomura, H. S153
Koda, S., Amano, T. and Nomura, H.
Copolymerization of sodium styrene sulphonate and vinylpyrrolidone under ultrasonic irradiation S91
Kojima, Y., see Nomura, H. S153
Kondo, T., Mišík, V. and Riesz, P.
Sonochemistry of cytochrome c. Evidence for superoxide formation by ultrasound in argon-saturated aqueous solution S193
Koyano, T., see Enomoto, N. S105
Kruus, P., see Entezari, M.H. S19

Lepoint, T., see Lepoint-Mullie, F. S73
Lepoint-Mullie, F., De Pauw, D. and Lepoint, T.
Analysis of the 'new electrical model' of sonoluminescence S73
Leveque, J-M., see Kimura, T. S157
Leveque, J.-M., see Ando, T. S223
Li, H., see Li, J. S141
Li, J., Li, L., Li, T., Li, H. and Liu, J.
An efficient and convenient procedure for the synthesis of 5,5-disubstituted hydantoins under ultrasound S141

Li, L., see Li, J. S141
Li, T., see Li, J. S141
Lindley, J., see Mason, T.J. S53
Liu, J., see Li, J. S141
Lorimer, J.P., see Mason, T.J. S53, S253
Luche, J.-L.
Synthetically useful sonochemical reactions in solution S215
Luche, J.-L., see Ando, T. S223
Luche, J.-L., see Nebois, P. S7

Madigan, N.A., Hagan, C.R.S., Zhang, H. and Coury, Jr., L.A.
Effects of sonication on electrode surfaces and metal particles S239
Maeda, Y., see Hirai, K. S205
Maeda, Y., see Okitsu, K. S249
Mark, G., see Fang, X. S57
Marken, F. and Compton, R.G.
Electrochemistry in the presence of ultrasound: the need for bipotentiostatic control in sonovoltammetric experiments S131
Mason, T.J., Paniwnyk, L. and Lorimer, J.P.
The uses of ultrasound in food technology S253
Mason, T.J., Newman, A., Lorimer, J.P., Lindley, J. and Hutt, K.
Ultrasonically assisted catalytic decomposition of aqueous sodium hypochlorite S53
Mills, A., see Worsley, D. S119
Mišík, V. and Riesz, P.
Recent applications of EPR and spin trapping to sonochemical studies of organic liquids and aqueous solutions S173
Mišík, V., see Kondo, T. S193
Mišík, V. and Riesz, P.
EPR study of free radicals induced by ultrasound in organic liquids – II: Probing the temperatures of cavitation regions S25
Mitchell, S.R., see Bremmer, D.H. S47
Mizukoshi, Y., see Okitsu, K. S249
Mo, X., see Wang, S. S65
Mo, X., see Wang, S. S69
